Subject: RE: WA Toxic Criteria and AWB Petitions
Attachments: Draft WA comparison chart 3 6 17.xlsx

Hi all,

Attached is a spreadsheet outlining WA's aquatic life criteria and comparing them for our call today. To briefly summarize:

Priority pollutants for which we have more stringent 304a:

Acrolein, arsenic, cadmium, copper, dieldrin, endrin, lindane, mercury, nickel, PCP, selenium

Of that list, which do we have jeopardy opinions in neighboring states on something the same or more stringent:

(Not sure about acrolein), arsenic (chronic only), cadmium (acute only), copper, mercury (chronic only), nickel, selenium (chronic only)

Non-priority pollutants that we have jeopardy opinions on our 304a for neighboring states: ammonia and aluminum

Also, please see initial responses to David's questions below in red.

David, to your last point, Matt has been digging up some old spreadsheets we had developed to compare WA's criteria to our current 304a, and to values in OR and ID where we had received corresponding jeopardy opinions
